## Education

Webster University, St. Louis, MO  
BA In Interactive Digital Media

## Professional Experience

Integrity, St. Louis, MO  
Front-end Developer & Scrum Master  
5/2012 - 8/2013

Integrity is a leader in the St. Louis web marketing scene, helping companies with anything from growing SEO hits to building complex web applications. While there, I was part of a web development team responsible for creating marketing sites, most often through the Wordpress.org CMS. Starting in January I was also responsible for leading a development team as the scrum master using agile.

Key achievements:

- ❑ Lead team using Agile development process
- ❑ Collaborate with design, project managers, and back-end development
- ❑ Converted psds into functional websites using wordpress cms with custom built theme and plugins
- ❑ Hand-coded HTML5 and CSS3 using bootstrap framework built on dynamic LESS CSS
- ❑ Implement and extend various jQuery plugins such as accordions and responsive menus
- ❑ Utilized best-practices in HTML5 structures and CSS3 styling to ensure bug-free quality code
- ❑ Used Git version control system to ensure code was collaborative and of the highest quality before launch
- ❑ Support and maintenance on around 15 different various sites

Rose Design, St. Louis, MO  
Front-end Developer  
8/2013 - 2/2014

Rose Design is a small company helping clients with custom print and web solutions.

Key Achievements:

- ❑ Help teach the current developer newer technologies such as developing responsive and a css preprocessor.
- ❑ Help redesign and develop their existing internal site to give them an updated cutting edge look and feel
- ❑ Use svn to track code
- ❑ Support and maintenance on several sites

Singularity Interactive, Boulder, CO

Front-end Developer

2/2014 - Current

Singularity Interactive is a start-up that currently does consulting work with aspirations to be an immersive gaming company. My time is spent helping to build a large-scale custom app, [polymer.gloo.us](http://polymer.gloo.us).

Key Achievements:

- ❑ Prototype and build UI for custom app
- ❑ Build and upkeep a custom responsive css framework
- ❑ Help bridge the gap between development and design teams
- ❑ Used Git version control system to ensure code was collaborative and of the highest quality before launch
- ❑ Used Angularjs to contribute to app and consume APIs
